18th Clinical Research Coordinator Training Program

September 7 to December 31, 2025

Program objectives

- 1 Prepare the applicant for coordinating clinical trials.
- 2 Equip trainees with the skills to analyze and discuss key issues such as protocol content, confidentiality, and patient rights.
- 3 Address critical gaps in clinical trials by training personnel to meet global standards and support research teams.
- 4 Enhance communication skills to effectively engage with study participants and the broader public.
- 5 Provide foundational administrative and clinical competencies essential for conducting clinical research.

Program Requirements

- Bachelor's degree in Health Sciences or other Applied Sciences.
- Updated CV
